PROFESSIONAL SUMMARY

Software Engineer with experience across backend systems, web applications, APIs, automation, and production environments. I build reliable, testable software with attention to security, observability, and performance. I am deepening my Applied AI Engineering work through practical LLM systems, measurable evaluation, and production-oriented controls.

PROFESSIONAL EXPERIENCE

Agência Catus | Full Stack Developer | Jul 2026 - Present

- Develop and evolve the agency's new website and two WordPress blogs, including Custom Post Types, theme customization, and new features.
- Maintain an e-commerce implementation on the Wake platform, troubleshoot production issues, and work on performance/Core Web Vitals.
- Deploy directly to server environments and continuously improve web applications.

EVAG Comunicação e Tecnologia | Developer | Apr 2024 - Present

- Developed Google Drive-to-WordPress automation for generating petition pages, reducing manual steps and making the publishing workflow more direct.
- Developed an internal request management solution integrated with GitLab, supporting organization, traceability, and flow of operational demands.
- Develop and maintain systems, websites, and automation with Laravel, PHP, Python, JavaScript, WordPress, and Tailwind, including production fixes and new features.

EVAG Comunicação e Tecnologia | Product Owner | Apr 2023 - Mar 2024

- Managed website delivery from discovery through delivery, connecting clients, design, and development.
- Structured requirements and support workflows, prioritizing across business needs, user experience, and the team's technical capacity.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP

Backend & runtime: Bun, Node.js, Laravel, REST APIs

Engineering: Clean Architecture, DDD principles, SOLID, Clean Code, TDD, microservices fundamentals, unit, integration and E2E tests, CI/CD, quality gates, resource limits, latency measurement, and production troubleshooting

Data & infrastructure: SQL/PostgreSQL, Docker, Git/GitHub Actions, and AWS Cloud fundamentals

Security & reliability: authentication, secure software development, validation, secret management, redacted logs, observability, and resource limits; authorization hardening in progress

Applied AI (current focus): LLM integration, structured outputs, deterministic baselines, evals, held-out benchmarks, hybrid policies, human review, and fallbacks; Python, PyTorch, ML/DL fundamentals, and AI coding agents with human review

Public project: ops-triage-ai — Triage with a deterministic baseline, local LLM, hybrid policy, human review, fallback, and audit trail. API limits and redacted logs; frozen 70-ticket synthetic benchmark: category 82.9% → 95.7%, HIGH/CRITICAL recall 78.6% → 100%, stronger baseline risk accuracy, p95 7078.6ms.

Public project: Salus — Layered TypeScript API with JWT issuance, Argon2, PostgreSQL/Prisma, 47 tests (36 unit + 11 integration), and CI; authorization hardening in progress.

Public project: Bilingual portfolio built with Bun/Astro/TypeScript/MDX, with CI quality gates for accessibility, SEO, performance, and publication integrity; automated distribution.

ADDITIONAL TRAINING

Alura: Software Engineering, Back-end, Node.js APIs, Authentication/Testing/Security, DevOps/CI/CD, Cloud/AWS, and Secure Development.

EDUCATION & LANGUAGES

Education: Systems Analysis and Development - UniBF | Completed in 2026

Languages: Portuguese (native) | English (advanced)
